

Fork Light Bracket BMW K75/100

P/N 100101v4

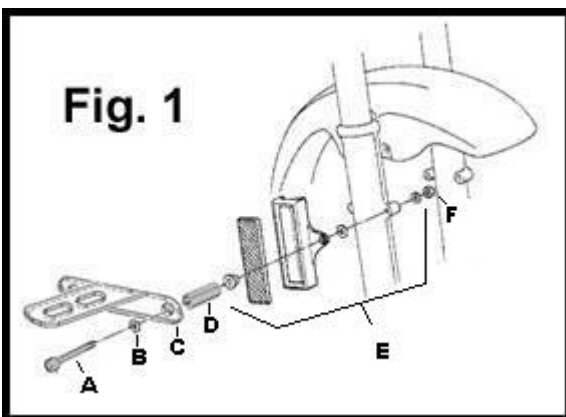

Kit Contents	Tools Required
(2) stainless steel brackets (4) stainless steel spacers (4) stainless steel bolts - M6x80mm (4) stainless steel washers (4) stainless steel nuts – M6 (1) Permatex medium threadlocker - .5ml	5mm Allen Wrench 10mm Combination Wrench

READ ENTIRE INSTRUCTIONS PRIOR TO INSTALLATION

*****CAUTION: BIKE PARTS MAY BE HOT*****

Installation Instructions:

1. Support bike on stand (center stand preferred if equipped).
2. Before removing original bolts, make note of where the original washers are located (**E** Fig. 1). They will be reinstalled in the same position.
3. Unscrew the original bolt.
4. Remove the original bolt slowly. Be sure to retain the original washers (**E** Fig. 1). **Note:** Washer could fall out and be difficult to find if allowed to drop.
5. Orient the bracket (**C** Fig. 1) so the flange with two pill shaped holes is perpendicular to the fork tube and above the inscribed part number.
6. Apply threadlocker to at least 1/4" of threads at the bottom of one M6x80mm kit bolt (**A** Fig. 1). **Note:** threadlocker will dry within several minutes.
7. Install one M6x80mm kit bolt (**A** Fig. 1) from this kit in the following order, installing the kit nut (**F** Fig. 1) loosely (see Fig. 1 for reference):
Kit Bolt -> Kit Washer -> Kit Bracket -> Kit Spacer -> ORIGINAL Pieces -> Kit Nut
8. Repeat steps 2 through 7 for the second bolt (letting the bracket loosely hang for easy removal of the second original bolt).
9. Tighten both nuts (**F** Fig. 1), alternating back and forth between the nuts tightening each a little at a time.
10. Repeat all steps for second bracket on opposite side of the fork.
11. Please follow manufacturer instructions for installing fog or driving lights.
